DETAILED ACTION

This is in response to RCE and amendments filed on 12/19/06 in which claims 1-11 and 13-22 are pending. The applicant's amendments have been fully considered but they are moot based on the new ground of rejection.

Specification

1. The abstract of the disclosure is objected to because in line 15 "(figure 9a)" must be deleted. Correction is required. See MPEP § 608.01(b).

Drawings

2. Figures 2, 4a and 5-6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 10-11, 16-22 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2611

5. Claim 10 recites the limitation "the selectors" in line 1. There is insufficient antecedent basis for this limitation in the claim.

6. Claim 11 recites the limitation "the combiners" in line 1. There is insufficient antecedent basis for this limitation in the claim.

7. Claim 16 recites the limitation "a separate clock signal different from the clock signal" in line 11. It is unclear as to which the clock signal the applicant or the claim is referring to. Therefore there is insufficient antecedent basis for this limitation in the claim.

8. Claim 20 recites the limitation "the i outputs of the shift register" in line 2. There is insufficient antecedent basis for this limitation in the claim.

9. Claim 21 recites the limitation " the i outputs of the shift register " in line 2. There is insufficient antecedent basis for this limitation in the claim.

10. Claims 17-19 are also rejected because they depend on a base rejected claim.

Allowable Subject Matter

11. Claims 1-9 and 13-15 allowed over the prior art of record.

12. The following is a statement of reasons for the indication of allowable subject matter: a plurality of phase delay networks, controlled by a separate clock signal distinct from the clock signal each phase delay network comprising a plurality of multipliers, each multiplier, receiving an input signal comprising a sequentially delayed code sequence and also receiving an input comprising a control signal; and ,an adder

Art Unit: 2611

block coupled to the output of the plurality of multiplier, wherein the control signals are selected to allow only of the sequentially delayed code sequence signal to reach the adder of each of the plurality, of phase delay networks.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
